

FOR IMMEDIATE RELEASE

AFRISAM ACKNOWLEDGES SUSTAINABLE CONSTRUCTION

Cement pioneer AfriSam recognises the achievements of those companies who apply innovative construction and building methodologies through the use of concrete. The company recently acknowledged Concor Building's Freedom Park project by presenting it with the Construction World Best Projects 'The AfriSam Award for Sustainable Construction's. Freedom Park is the culmination of President Mandela's vision for a people's shrine and incorporates extremely inventive use of concrete to produce rounded and curved building planes which lend themselves perfectly to the undulating surfaces forming the walls and roofs of the various building elements.
